ECONOMIC UPDATE

- Recent economic data suggest slower growth in 2025 and greater market uncertainty as the effects of fiscal policy unfold. Inflationary trends have subsided, but core levels remain above the Fed's target, and tariff impacts remain uncertain. The labor market is exhibiting a softening trend. Given the economic outlook, we expect gradual normalization of monetary policy and a steepening yield curve.

- As broadly anticipated, the Federal Open Market Committee (FOMC) left the Federal Funds Rate unchanged at the range of 4.25 - 4.50% at the July meeting. Fed governors Waller and Bowman dissented in favor of a rate cut, marking the first time since 1993 that two members have dissented. Chair Powell reaffirmed a cautious, data driven approach, emphasizing that future policy decisions will depend on economic and trade developments.

- US Treasury yields rose, and the curve flattened in July. The 2-year Treasury yield jumped 24 basis points to 3.96%, the 5-year Treasury increased 18 basis points to 3.97%, and the 10-year Treasury yield rose 15 basis points to 4.38%. The spread between the 2-year and 10-year Treasury yield points on the curve narrowed to +42 basis points at July month-end versus +51 basis points at June month-end. The spread between the 2-year Treasury and 10-year Treasury yield one year ago was -23 basis points. The spread between the 3-month and 10-year Treasury yield points on the curve was +4 basis points in July versus -7 basis points in June.

Unemployment Rate

Source: US Department of Labor

The U.S. economy added 73,000 jobs in July, and the last two months were revised down by 258,000. Gains were primarily driven by healthcare and social assistance. The three-month moving average and six-month moving average payrolls totaled 35,000 and 64,000 respectively. The unemployment rate rose to 4.2% in July from 4.1% in June, due to a shrinking labor force. The labor participation rate dipped to 62.2%, remaining below the pre-pandemic level of 63.3%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons jumped to 7.9% in July from 7.7% in June. Average hourly earnings increased to 3.9% year-over-year from 3.8% last month.

Consumer Price Index (CPI)

Personal Consumption Expenditures (PCE)

In July, the Consumer Price Index (CPI) increased 0.2% month-over-month and rose 2.7% year-over-year, while the Core CPI rose 0.3% month-over-month and 3.1% year-over-year. The Personal Consumption Expenditures (PCE) price index increased 0.3% month-over-month and rose 2.6% year-over-year in June. The Core PCE deflator, which excludes food and energy and is the Fed's preferred gauge, increased 0.3% month-over-month and 2.8% year-over-year. Although inflation has trended toward the Federal Reserve's 2% target, the overall impact of tariff policy has not yet fully flowed through to the US economy.

Effective Federal Funds Rate

As broadly anticipated, the Federal Open Market Committee (FOMC) left the Federal Funds Rate unchanged at the range of 4.25 - 4.50% at the July meeting. Fed governors Waller and Bowman dissented in favor of a rate cut, marking the first time since 1993 that two members have dissented. Chair Powell reaffirmed a cautious, data driven approach, emphasizing that future policy decisions will depend on economic and trade developments. The monthly redemption cap on Treasuries will remain at \$5 billion, while the cap on agencies and mortgage-backed securities will be maintained at \$35 billion. Since the Fed began its Quantitative Tightening campaign in June 2022, securities holdings have declined by about \$2.2 trillion to approximately \$6.7 trillion.

US Treasury Yield Curve

Source: Bloomberg

At the end of July, the 2-year Treasury yield was 30 basis points lower, and the 10-Year Treasury yield was 34 basis points higher, year-over-year. The spread between the 2-year and 10-year Treasury yield points on the curve narrowed to +42 basis points at July month-end versus +51 basis points at June month-end. The recent yield curve inversion which began in July 2022 was historically long. The average historical spread (since 2005) is about +99 basis points. The spread between the 3-month and 10-year Treasury yield points on the curve was +4 basis points in July versus -7 basis points in June.

2025 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by ICE Data Services Inc (“IDS”), an independent pricing source. In the event IDS does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client’s Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody’s, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities (“MBS”) reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest.
